

## Her Computer

Saturday, 28 March 2015 19:56

---

Maisie set up a computer on her desk (a step stool she likes to sit at picnic-table-fashion). I'm not sure if the black tin is supposed to be the screen or the computer. Maybe both. She is very firm about this being *her* mouse but sometimes complains that it doesn't work and will borrow mice from other desks.
